

Retail Sales Analytics & Performance Report

Project Title: Retail Sales Performance Dashboard

Prepared by: Asmaa Montaser Bedir

Tool Used: Microsoft Excel (Data Model, Pivot Tables, Advanced formulas, Dynamic Dashboard)

Date: September 2026

1. Executive Summary

This project presents a comprehensive sales analysis for a retail business. The main goal is to help decision-makers understand sales trends, track profitability, and reduce product returns.

By cleaning raw data, creating a structured Data Model, and building interactive Pivot Tables, I designed a dynamic dashboard that transforms complex sales numbers into clear, actionable business insights.

2. Key Performance Indicators (KPIs)

To monitor overall business performance, the dashboard tracks 7 core metrics:

- 1. **Total Sales:** Total revenue generated after applying discounts, but before deducting product returns.
- 2. **Total Returns:** Total monetary value of items returned by customers.
- 3. **Net Sales:** Actual revenue kept after subtracting product returns from total sales.
- 4. **Net Profit:** Net financial gain earned after covering product costs and return losses.
- 5. **Profit Margin (%):** Percentage of revenue converted into profit, measuring overall pricing and operational efficiency.
- 6. **Total Orders:** Total number of customer orders processed during the period.
- 7. **Total Customers:** Total count of unique customers served.

Total Sales	Total Returns	Net Sales	Net Profit	Profit Margin	Total Orders	Total Customers
\$1,113,384	\$125,970	\$987,414	\$283,943	29%	1500	128

3. Technical Workflow & Methodology

The project was executed through four main steps:

Data Cleaning & Preparation:

- Handled missing values, formatted dates, and corrected data types.
- Created logical relationships between sales, products, and regional data tables.

Pivot Tables & Data Modeling:

- Answered over 15 key business questions using custom Pivot Table.
- Built Calculated Fields to accurately measure Net Sales, Profit Margin %, and Return Rate %.

Dashboard Design & Visuals:

- Used a Combo Chart to visualize sales revenue alongside profit margin % over time.
- Designed a Line Chart to track sales trends over time (Sales by Months).
- Created Horizontal Bar Charts to highlight top performers (Top 10 Cities and Top 10 customers).
- Used a Donut Chart to display category distribution.
- Integrated interactive Slicers & Timelines to filter data seamlessly across all visual charts.

Formatting & User Experience

- Removed gridlines and backend calculations sheets to deliver a clean, executive dashboard layout.

4. Key Business Insights & Strategic Recommendations

1. Regional Performance & Revenue Dominance

Insight: The South Region achieved the highest revenue across all territories, generating **\$320.5K** in sales with a solid profit contribution of **\$96.7K**.

Row Labels	Sum of Sales	Sum of Profit
South	320,529	96,744
East	273,768	79,196
West	272,036	74,996
Central	244,749	67,794
Grand Total	1,111,082	318,730

Recommendation: Capitalize on the South Region’s high demand by expanding inventory capacity and analyzing its promotional strategies to replicate this success in lower-performing regions like Central and West.

2. High-Margin Category Focus

Insight: The Technology category emerged as the primary growth engine, contributing **60%** of total business revenue **\$668K**, with Business Laptop and Laser Printer leading overall product performance.

Row Labels	Sum of Sales
Business Laptop	237,469
Conference Table	187,488
Laser Printer	126,236
Business Smartphone	109,720
Five-Shelf Bookcase	76,185
Grand Total	737,098

Row Labels	Sum of Sales
Technology	668,326
Furniture	412,197
Office Supplies	32,862
Grand Total	1,113,384

Recommendation: Allocate a larger share of the marketing budget to high-margin Technology campaigns and maintain strong supplier relationships to prevent stockouts of top-tier items.

3. High Customer & Market Concentration

Insight: Nashville ranked as the top-performing city \$94K in sales, while the Top 10 Customers generated a substantial portion of total revenue, highlighting key sales concentration opportunities.

Row Labels	Sum of Sales
Nashville	94,033
Miami	79,029
St. Louis	76,651
Austin	76,062
San Francisco	74,528
Jacksonville	68,806
Boston	68,299
Los Angeles	53,561
Denver	52,305
Seattle	49,286
Grand Total	692,561

Row Labels	Sum of Sales
Emma Mitchell	29,463
Daniel Rivera	28,916
Daniel Morgan	23,723
Henry Parker	23,410
Sophia Bailey	22,335
Abigail Parker	20,741
Emma Ross	18,634
Mia Price	17,922
Noah Foster	17,664
Ella Mitchell	17,575
Grand Total	220,382

Recommendation: Launch an exclusive VIP loyalty program for the Top 10 customers to secure high-value recurring orders and introduce targeted localized discounts in key hubs like Nashville to strengthen retention.

4. Product Return Mitigation & Revenue Protection

Insight: Product returns reached \$125.9K, creating a gap between Total Sales \$1.11M and Net Sales \$987.4K.

Analysis reveals that sending the “Wrong Item” is the primary driver of returns.

Row Labels	Count of Return Reason
Wrong Item	41
Customer Changed Mind	40
Damaged	35
Late Delivery	32
Defective	32
Grand Total	180

Row Labels	Sum of Sales
Yes	125,970
(blank)	987,414
Grand Total	1,113,384

Recommendation: Upgrade warehouse fulfillment operations and quality check protocols to eliminate Wrong Item dispatch errors, while reviewing shipping logistics to address delays and damages, directly protecting the Net Sales baseline.

5. Seasonal Sales Trends & Peak Performance

Insight: Monthly sales peaked significantly in **April**, generating the highest revenue of the year, followed by a steady decline towards Q4, reaching its lowest point in December.

Recommendation: Focus promotional budgets and stock readiness right before April to maximize the peak period, while running Q4 discount campaigns to revive late-year sales.

6. Discount Strategy Optimization & Profit Protection

Insight: Discounts above 20% severely erode overall profit margins down to 16%, whereas maintaining low-to-moderate discounts of 5% to 10% preserve strong margins between 27% and 32%.

Row Labels	Sum of Gross Sales	Sum of Sales	Sum of Profit	Profit margin
0%	413,195	413,195	144,309	35%
5%	187,229	177,867	56,127	32%
10%	226,422	203,779	54,754	27%
15%	170,855	145,227	36,333	25%
20%	216,645	173,316	27,766	16%
Grand Total	1,214,345	1,113,384	319,289	29%

Recommendation: Limit standard promotional discounts to a maximum threshold of 10% to safeguard gross profit margins and prevent unnecessary margin dilution.

7. Sales Workforce Performance & Knowledge Sharing

Insight: Top sales representatives such as **Anna** generate significantly higher sales and profit compared to lower-performing reps, indicating a wide performance gap across the sales team.

Row Labels ▼	Sum of Sales	Sum of Profit
Anna	162,260	48,845
Youssef	147,509	41,169
Omar	143,055	41,921
Mariam	142,307	44,412
Nour	136,556	38,114
Salma	136,260	39,349
Maya	126,406	33,046
Kareem	119,031	32,432
Grand Total	1,113,384	319,289

Recommendation: Utilize top-performing sales reps to mentor lower-performing staff and share proven closing strategies to elevate overall team productivity.
